

eXpress — Your Own Private Teams. Your Own Secure WhatsApp. All-in-One.

Secure. Sovereign. Shadow IT-proof.

Why Now?

Shadow IT Is Out of Control:

In regulated sectors, staff default to consumer messengers like WhatsApp or Telegram for speed and ease — creating unmonitored communication channels, compliance gaps, and data leakage risks.

Growing Scepticism Toward Public Cloud:

A 2024 Barclays survey shows 83% of enterprises plan to shift workloads off the public cloud, with 94% of IT leaders already executing repatriation due to rising costs, sovereignty concerns, and compliance demands.

Regulatory & Geopolitical Pressures:

In the UK, 95% of IT leaders worry about data control, with over half reducing dependence on U.S. cloud providers due to political and legal changes.

Market Concentration & Systemic Risks:

AWS, Microsoft, and Google control ~65% of global cloud infrastructure, creating single points of failure and geopolitical vulnerabilities.

Who We Serve

Government bodies:

Ministries, municipalities, law enforcement, defense

Banks & insurance firms:

Especially state-owned or central banks

Critical infrastructure:

Energy, telecom, transportation, public utilities

Public healthcare & education systems

Sovereign cloud
or national data platform projects

The Problem

Existing tools (Teams, Slack) feel slow and disconnected outside the office

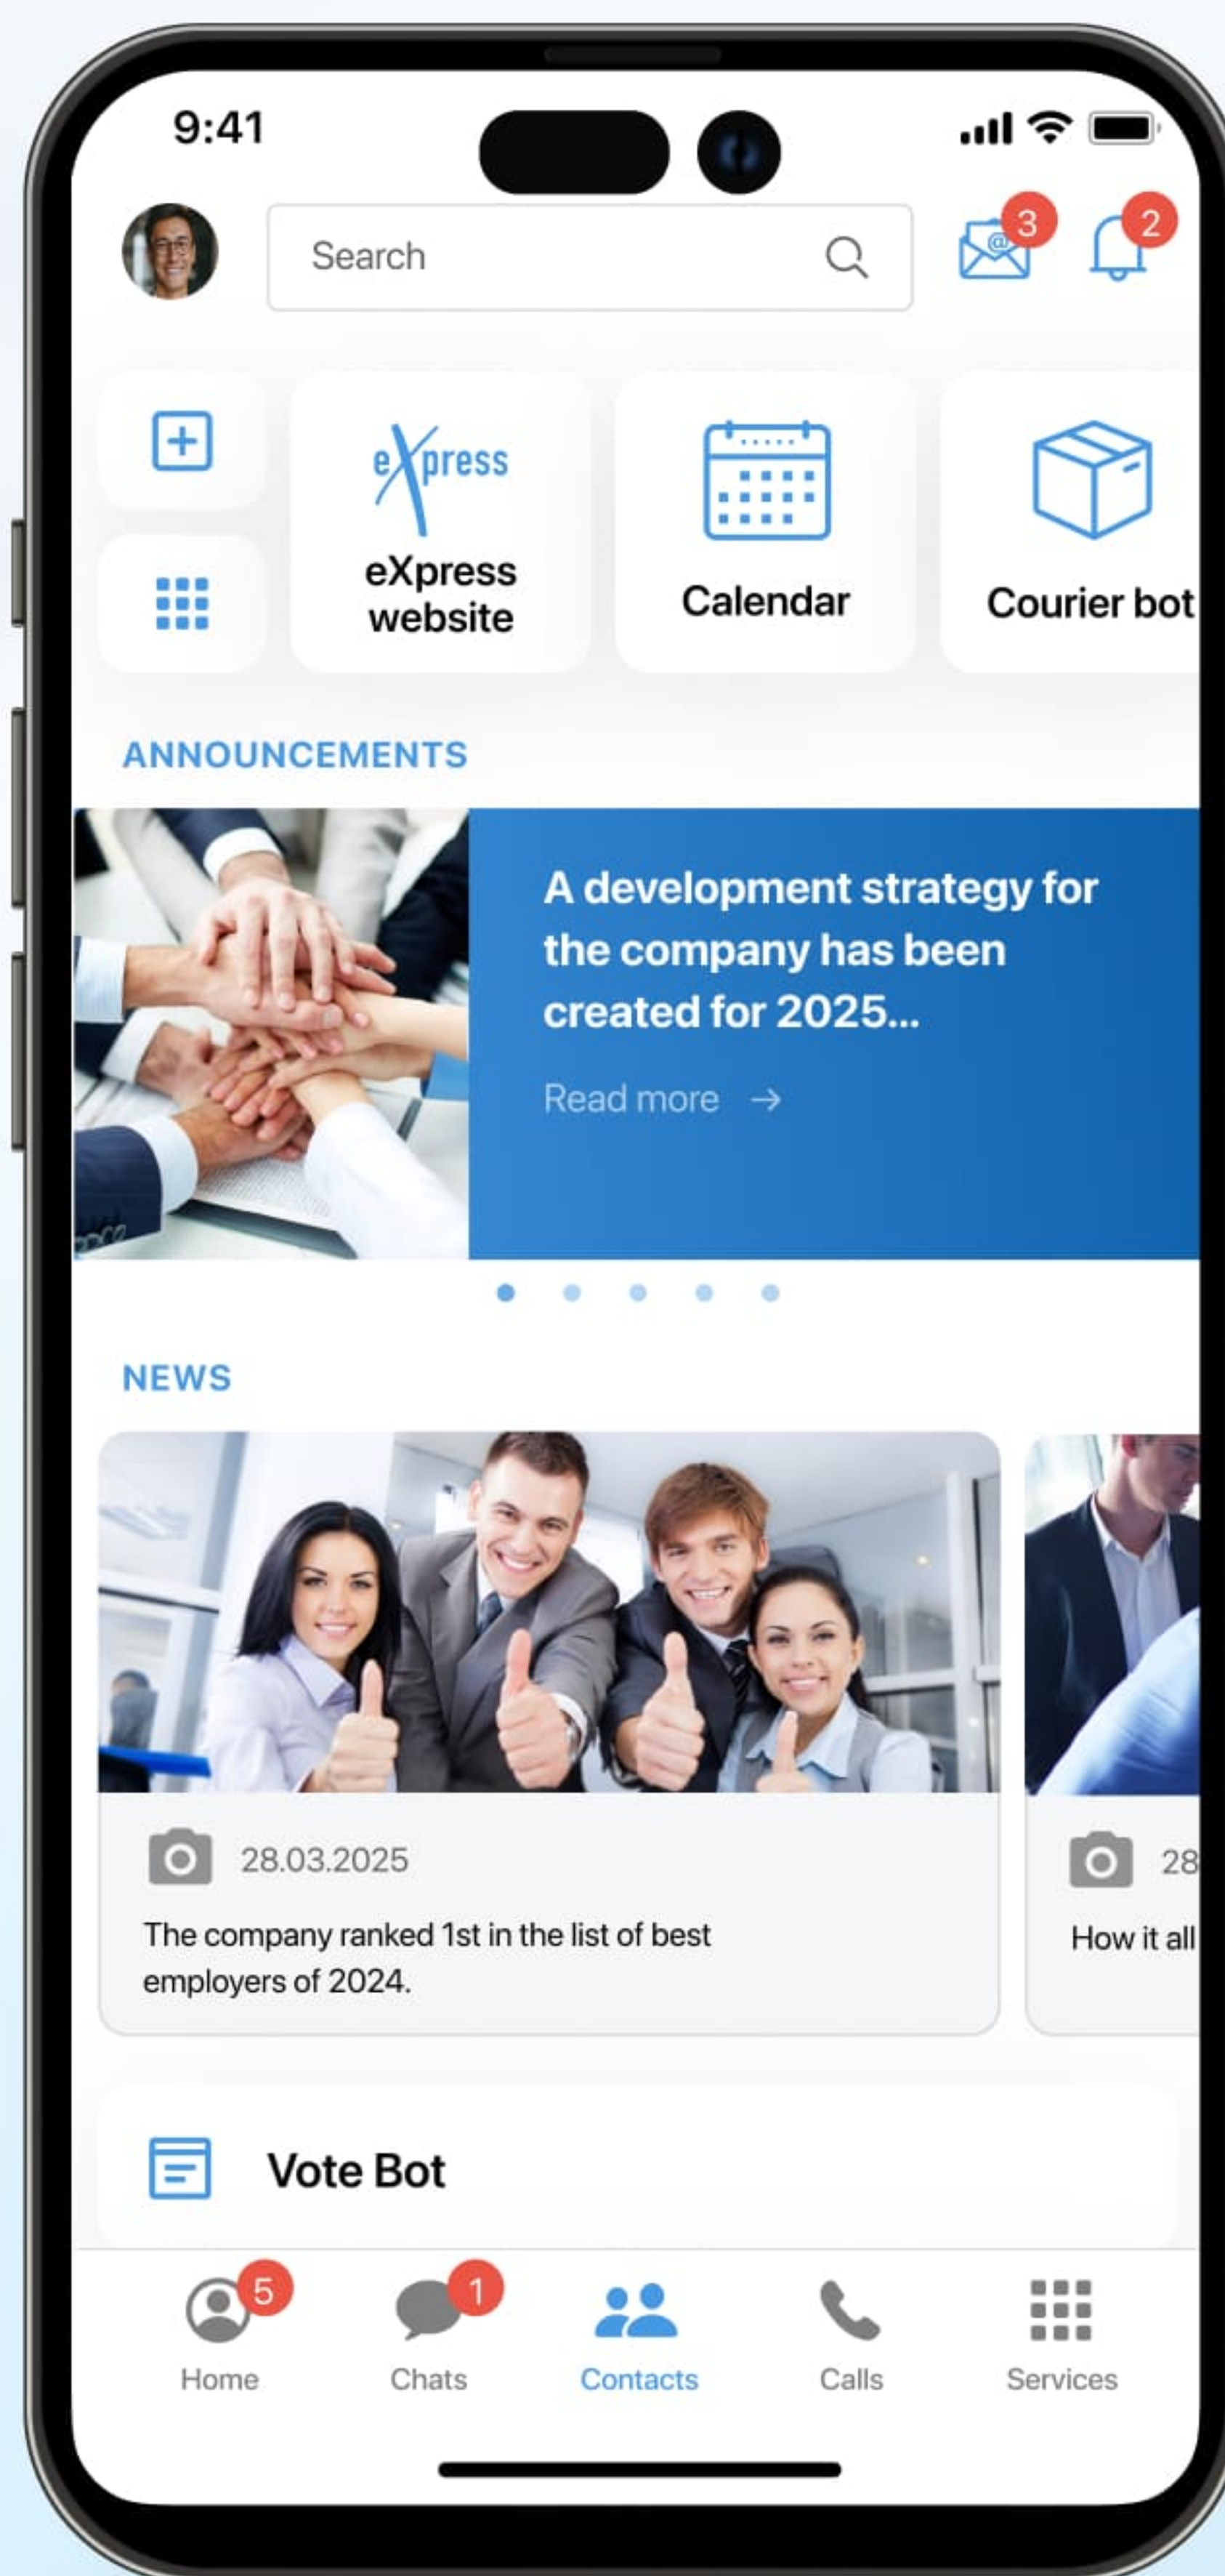

Staff default to WhatsApp/Telegram for convenience — risking sensitive data

Foreign cloud dependencies undermine digital sovereignty

Mobile-first environments demand fast, secure, real-time collaboration

The eXpress Advantage

Messenger:

Secure chat, audio, and video calls

Video conference:

Enterprise-grade meetings with full control

Chatbots:

Automate workflows and integrate with core systems

SmartApps:

Integrated email, calendar, and business process apps in one interface

Federation mode:

Connect multiple organizations without losing autonomy

Why We Win

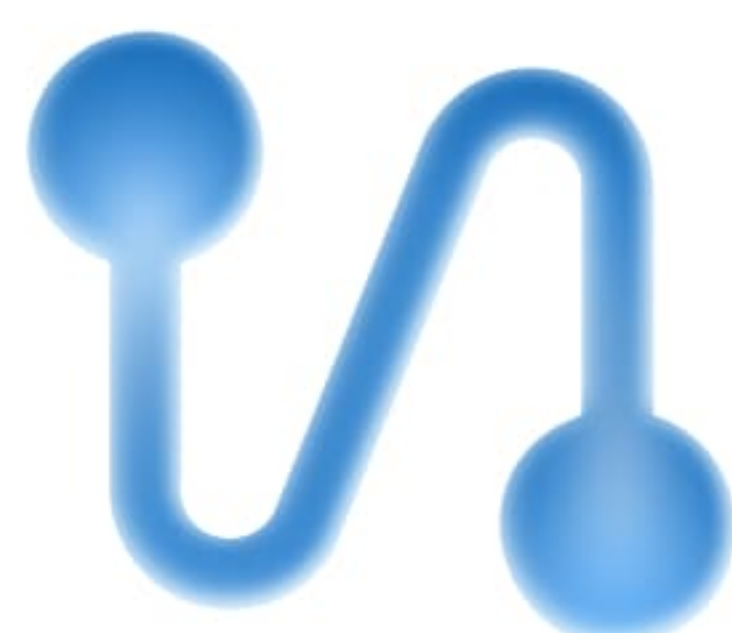

Absolute Security, Zero Compromise:

overseign deployment with full auditability and no data leaving your control

User Experience:

As simple as WhatsApp, as powerful as Teams

Eliminate Shadow IT:

Easy, secure mobile UX replaces consumer messengers

Freedom of Deployment:

On-prem, private cloud, or sovereign cloud — your choice

Core Pitch

“Most enterprises have Teams or Slack — but on mobile, people still default to WhatsApp or Telegram. eXpress fixes that. It delivers a real-time, fully synced experience across all devices — without compromising security, compliance, or control.”

Next Steps

Schedule a 30-minute demo to see how eXpress can secure and unify your communications — without sacrificing usability.

Proof Points

10+ years of continuous development

Trusted by 13 of the top 20 enterprises in our domestic market

2M+ users in eXpress Federation

Deployed at Rosatom for 100,000 users
